Backend Skills

- Node JS
- Express
- API (RESTful, JSON, Postman)
- Heroku
- Relational & non-relational database (PostgreSQL, MongoDB)
- AWS
- Serverless Functions
- Ktor

Tools

- Visual studio code
- Android studio
- GitHub
- Postman
- Kanban (Trello)
- MS Office
- ChatGPT
- Figma

Languages

- Albanian (Native)
- English (C1)
- German (B1)

PROFILE

Certified Full-Stack Web Developer with a background in a leading role in Logistics, overseeing a team of 20 employees and successfully resolving over 80 payment issues monthly. With a background in software and hardware repair, diagnosed, troubleshooted, and fixed more than 15 devices weekly. Strong passion for technology and web development. With a deep interest in frontend development and a willingness to explore the backend with Node.js, driven to create user-friendly and enjoyable online experiences. Eager to learn and have a strong work ethic to excel in this dynamic field. Proficient in HTML, CSS, JavaScript, React, Angular and Node JS.

WEB DEVELOPMENT PROJECTS

CareerFoundry

Study project

10/2023 - 10/2023

Personal Website and Portfolio

- Built a single page responsive Portfolio website using HTML, CSS and Javascript
- Created a side navigation bar with links to the relevant sections
- Created a Card list to showcase all the project I've worked on
- Developed a comprehensive 'About Me' section within the portfolio website, offering a detailed overview of my background, skills, and experiences, which is the objective of a portfolio website

Portfolio

CareerFoundry

Study project

06/2023 - 09/2023

MyFlix App

- Built the complete server-side and client-side from scratch
- Created a RESTful API using Node.js and Express that interacts with a non-relational database (MongoDB) and tested API endpoints in Postman
- Built the interface of a single-page, responsive application, developed with React JS and React bootstrap, resulting in a fully functioning web app allowing users to register or log in to view movies and details & update their user profile
- Built the same version but in Angular with Typescript and Material Design
- MyFlix App allows movie enthusiasts to access information about different movies, create user profiles, and save their favorite movies.

CareerFoundry

Study project

08/2023 - 08/2023

Meet App

- Built a Progressive Web App (PWA) with React, using test-driven and behavior-driven development techniques, that uses a Google Calendar API
- Implemented serverless functions (AWS Lambda) to authenticate + authorize users (OAuth 2.0)
- Developed and tested the app's unit functions using Jest, followed by integration tests using user stories (Gherkin) and end-to-end testing with Puppeteer, resulting in a 100% test coverage, bug-free web app, allowing users to filter for events and specific city and use the app offline

WORK EXPERIENCE

Pronajtrans

Logistics

Allershausen, Bayern

11/2015 - 03/2023

Dispatcher

- Trained and oversaw a team of more than 20 employees in dealing with dangerous goods, cargo securing, etc. Resulting in better job performance of team members in a time of a big staff shortage.
- Was able to find more than 80 unpaid deliveries monthly that the contractors didn't pay by comparing the paid deliveries and the daily delivery list by using Excel lists and tables, resulting in increased revenue by 5-10%.

Mobile Technology

Electronics and repair shop

Prishtina, Kosovo

11/2009 - 10/2015

Technician

- Successfully diagnosed and repaired a wide range (more than 100 models) of mobile phones in my tenure there, including smartphones, PCs, and laptops, ensuring the restoration of more than 15 devices on a weekly basis. Proficient in diagnosing and fixing both common and complex issues led to a high customer satisfaction rate and a steady increase in the number of devices serviced during this period.
- Successfully managed sales of mobile phones, smartphones, laptops, and associated accessories of over 10 products daily. Efficiently maintained inventory by keeping track of the products on Excel sheets which helped in stocking back the products that were just sold. Communicated with suppliers on the availability of the sold products and any new products with potential market appeal.
